TECHNICAL SKILLS

HTML, CSS, JS, REACT, Redux

TypeScript and ES6

Node.js and Express

REST + GraphQL

Testing tools (Jest, Playwright)

SQL and NoSQL

CERTIFICATIONS

02/2025

React

06/2025

Walmart USA - Advanced Software Engineering Job Simulation

Motivated and results-driven Frontend Developer with 3+ years of experience in developing scalable, data-driven, consumer-facing web applications. Proficient in React, TypeScript, Node.js, and modern testing frameworks. Experienced in database design using SQL and NoSQL solutions, deploying applications on Azure, and collaborating in both independent and team environments. Strong understanding of software development best practices, with keen attention to UI/UX and visual detail.

WORK HISTORY

August 2020 - September 2023

Frontend Developer IsoWhiz PVT LTD, Hyderabad, India

- Developed a Financial Service website using React, Redux, TypeScript, and Tailwind CSS, focusing on component reusability, responsiveness, and clean UI aligned with UX principles.
- Employed HTML5, CSS3, and modern JavaScript (ES6+) features to build responsive layouts and dynamic interactions, including filterable product grids and real-time search with debouncing.
- Integrated Node.js with Express for the backend, handling routes for products, authentication, and cart operations, structured RESTful APIs to ensure scalability.
- Integrated product and user management with MongoDB, applying NoSQL database principles.
- Implemented GraphQL for fetching filtered product data with fewer requests and improved performance over traditional REST in certain components.
- Applied basic performance optimizations like lazy loading, image compression, and memoization (React.memo, useCallback) to improve load times and reduce re-renders.
- Designed consistent visual layouts using UI/UX principles, ensuring mobile-first responsiveness and intuitive navigation across devices.
- Utilized TypeScript throughout the codebase, creating strong typings and interfaces to minimize runtime errors and improve developer experience.
- Used Azure for deployment, leveraging cloud capabilities for testing and scale.
- Integrated automated testing using Jest and React Testing Library for component tests, and experimented with Playwright for end-to-end testing of checkout and login workflows.
- Addressed real-world issues such as inconsistent API responses by writing data normalization utilities and robust error handling for API calls.
- Practiced Git-based version control with feature branches and pull requests to simulate team collaboration and code reviews.
- Demonstrated strong written communication by documenting components and workflows clearly.

EDUCATION

December 2024

Master of Science Computer Science

University of Central Missouri, Warrensburg, United States

July 2021

Bachelor of Science Computer Science

JNTUH, Hyderabad, India
